FREE DOWNLOADABLE OBJ MODELS (SOME WEB LINKS)

Finger3D is compatible with wavefront .obj 3D models libraries. You can find and download them from the web.

For example:

[Finger3D \(HD\): compatible 3D "obj" models - web link](#)

*You can use for example the app "**megaDownloader Web Browser (HD)**" to download the obj models, unzip them, store them in the device memory, share them with Finger3D (HD) app (import and merge them with the current Finger3D (HD) 3D model):*

- using "megaDownloader Web Browser (HD)" app, tap on the desired 3D object (from [Finger3D \(HD\): compatible 3D ".obj" models - web link](#)

)

- wait the end of the download (see the download status in the megaDownloader Web Browser "Downloads" window)

- when the download is complete, tap on the "<model>.zip" file (downloaded file)

- press the "Unzip" button and wait a few minutes (until the end of unpacking procedure)

- explore the extracted <3DModels> folder tapping on the <3DModels> folder and/or its subfolders

- tap the .png files to see the models preview

- to import the 3D models into Finger3D (HD): tap on .mtl file (if it exists), press "Open In" button, choose Finger3D (HD), come back to megaDownloader Web Browser (HD) app, tap on **.obj**

file (start from here if the .mtl file does not exists), press "Open In" button, choose Finger3D (HD)
