- Connect the device to a MAC or PC using the usb cable
- Run iTunes software on Your MAC or PC
- Click on Your device name (iTunes - left)
- Click on "App" tab (iTunes - up)
- Low left on the screen, select Scribes PRO (You have to scroll down the iTunes App page - if You do not scroll down You can not see the "iTunes Files Sharing" apps and the "Documents" area). When You select the app (left), right on the screen (in the "Documents" area) You can see Your recorded audio files (<files>.caf)
- Drag the recorded audio files from the "Documents" area (iTunes - low right) to a MAC or PC folder to copy the recorded audio files from Your device to Your MAC or PC (or viceversa)

***** How can i import the .caf files recorded by Scribes PRO into iTunes app audio files (audio file encoding:**

.caf -> .mp3 or .caf -> .m4a) *?**

- copy the Scribes PRO recorded <file>.caf file in Your MAC using "iTunes File Sharing" ([iTunes File Sharing - Help](#)

)

- using the "Finder" app on Your MAC, press the mouse right button on the <file>.caf file and choose "Encode Selected Audio Files" from the menu

- choose the format You prefer (like for example "Apple Lossless" --> .m4a --> conversion: **.caf -> .m4a**

--> .m4a files can be imported into iTunes app audio files)

- use Audacity to convert the .m4a to .mp3 (conversion: **.m4a -> .mp3** --> .mp3 files can be imported into iTunes app audio files)
